## Huck-Spin Fasteners

**Huck® SpinCutter™**  
Collar Cutting Kit For Huck-Spin® Fasteners

Save your oxy-acetylene torch for other jobs. Convenience and safety have taken a quantum leap forward with the new SpinCutter Collar Cutting Kit. No more red-hot parts, molten sparks, or protective gear when removing Huck-Spin fasteners. Mastered in minutes, the SpinCutter splits their collars smoothly and swiftly with hydraulic force and precision.

### More Blade Durability -- by Far

The Huck SpinCutter makes frequent blade replacements a thing of the past. While some collar cutters require new blades after only a couple dozen cuts or fewer, the SpinCutter's ultra-durable blades can split up to a thousand Huck-Spin collars before wearing out. You'll save more than money with the SpinCutter -- you'll save time.

### Double-Duty Value

In addition to the collar-cutting nose assembly, the SpinCutter Kit includes a second nose for installing new Huck-Spin fasteners when completing a repair. You'll enjoy double the duty -- and double the value -- from a single tool.

### Order the Complete Kit, or the SpinCutter Tool and Noses Only

The basic Huck SpinCutter Kit includes all of the following:

- Production-quality Huck 2624HS hydraulic tools and hoses
- SpinCutter nose assembly
- Huck-Spin installation nose assembly
- Compact air-driven power source (or Huck POWERIG® 940, optional at extra cost)

Or you can order the SpinCutter tool and nose assemblies independently if you already own a POWERIG. For information about ordering the Huck SpinCutter Collar Cutting Kit -- or any Huck brand tool or tooling part -
